Department of Agriculture, Ottawa

Issued under direction of Hon. James G. Gardiner, Minister.

"Facts About Grain."

The following items are supplied by the Grain & Milling Advertising Service, Winnipeg:

The Board of Grain Commissioners has 347 trained employees engaged in inspection.

Every sample of grain inspected by them is dealt with on its merits. The identity of the shipper and the locality of the farm that grew the crop are both unknown to the inspecting Government official.

In the year 1936 there were 178,011 inspections; 37,288 cars were re-inspected by Chief Inspectors; 17875 had the grade raised; 243 had the grade lowered; 299 had the dockage raised; 2553 had the dockage lowered.

In the same year 2196 appeals were taken to the appeal tribunals; 370 had grade raised; 9 had the grade lowered; none had the dockage raised, and 11 had dockage lowered.

In most cases of re-inspection and appeal the farmers' claim was given expert assistance by an elevator organisation.

This record of labor and care is a tribute to the Government grading system and to the officials who impartially perform their public duty.

Saturday was the Secretary's Best Day.

Secretary Joseph Best was in town again on Saturday last, for the purpose of collecting rates from the taxpayers of Inga M. D. Saturday proved to be the most successful day of the three he had spent here for this purpose—he having taken in on that day something over three thousand dollars. Yesterday, Dec. 15, was the last day for paying rates, following which a penalty is added.

Winners at Whist.

The first of the season whist drive was held Friday night in the town hall by the members of the Senior Hockey Club, with a large attendance present. The winners were—

Gents—Albert Wudel 1st. Ed Euders and Claude Kewley were tied for second place; the tie was broken by Mr. Euders winning Third prize was taken by Mr. Carl Holm.

Ladies—Miss Barbara Mundt 1. Mrs. R. M. Outway 2nd, Mrs. Irwin 3rd.

Dance New Year's Eve.

The Hockey Boys are arranging to hold a big dance on the night of Friday, December 31st (New Year's Eve), and are having an orchestra out from the City, to give the music. New Year's Eve dances here have always been a popular feature, and no doubt the coming dance will be no exception to the rule. Good music and favors for everyone. This will be a golden opportunity to dance the old year out and the new year in.

Cabinet Rank for MacKinnon Is Asked.

Granting of cabinet representation to Alberta by appointment of James A. MacKinnon, M. P. for West Edmonton, as a federal minister, is urged in a resolution that the Executive of the Alberta Liberal Association has forwarded to Premier King thru its secretary, Geo. J. Bryan. The resolution is: "We, the Executive of the Alberta Liberal Association, desire to place before you our views in connection with Alberta's representation in the cabinet.

"You have expressed on many occasions, and we entirely agree, that a proper spirit of mutual understanding, compromise and goodwill can best be obtained by so arranging that each province of Canada should have representation in the federal Cabinet.

"The province of Alberta is presently represented on the Government side by James A. MacKinnon, whom we believe, has all the qualifications and would worthily represent the particular view point of this province.

"We desire to place before you the resolution passed at the recent convention in Calgary, and we trust you will give this your full consideration;

"Now, therefore, be it resolved that the Alberta Liberal Association do respectfully recommend to the Rt. Hon. W. L. Mackenzie King, C.M.G., M.P., that he grant to the province of Alberta a direct voice in the federal cabinet by including in that body James A. MacKinnon, M.P."

HARDWICK'S

The Store with the Christmas Spirit!

Gift Suggestions.

For Mother---

Embroidered Pillow Cases, Fancy Hose, Night Gowns, Dresses, Fancy Towels, Lingerie, Gloves and Scarves, Rayon Bed Spreads, Chinaware, Fancy Stationery, 20 cents to 85 cents. Boxed Handkerchiefs, 25 cents, up.

For Father---

Dress Shirts, Up-to-date Neckties, Fancy Socks, Gloves and Mitts, Handkerchiefs, Scarves, Sweaters, Slippers, Suspenders, Garter Sets.

For Boys and Girls---

Toys, Picture Books, Dolls, Animals, Hankies, Ties, Games, Sweaters, Moccasins, Socks, Fancy Belts, etc. Fancy Boxed Chocolates, Xmas Candy.

Watchful Policy Needed

In the mass of material that has already been submitted and is still being presented to the Rowell Commission on Dominion-provincial relations there is danger of some matters of considerable importance to the west being overlooked because of lack of emphasis, or at least side-tracked as comparatively insignificant when balanced against the more overwhelming issues of finance and divisions of legislative and administrative responsibility.

One of these problems which is apt to get the "miss in bulk" because of the absence of the spectacular is that of assistance in the further development of the Hudson Bay route and for aid in promoting additional business for the direct and shore pathway between the Canadian west and European markets submitted at the Regina sitting of the Commission by the On-to-the-Bay association as a section of the Saskatchewan Government brief.

A Five-Year Plan

The Association asked that consideration be given to proposals that the Federal government absorb the differential in marine insurance rates as between the Bay route and the Lake and Rail route via Montreal, to place rates between Winnipeg and Great Britain on a competitive basis, for a period of five years.

The Association also requested the Federal government to establish a modern coal handling plant at Churchill equipped with screening facilities, weigh scales and other equipment to ensure prompt and economic discharge of incoming cargoes of Welsh anthracite coal and the installation of additional storage facilities, both at Churchill and intermediate points such as Hudson Bay Junction and The Pas to facilitate the storage and breaking of bulk of merchandise for the wholesale and retail trade in Manitoba and Saskatchewan cities.

Marine Insurance Rates

There is a good deal to be said in furtherance of these requests, much more than was contained in the brief and considerably more than space permits in this column.

In respect to the first request it should be pointed out, however, that if marine insurance rates continue to decline with the same speed that they have since the route was opened for business in 1931 by the end of a five-year period, provided sufficient volume of traffic can be secured, the rates will by that time be down to the same level as rates prevailing for inward and outward bound consignments through the St. Lawrence. Given improved crop conditions the necessary volume of business to ensure the result should be handled through Churchill during the next five years if the requested Federal aid is forthcoming.

An Economic Proposition

Increased volume of traffic in both directions is also the objective of the requests for coal handling and storage facilities. The provision of such facilities would not only tend to make feasible inbound cargoes of Welsh coal and merchandises but would go a long way towards promoting the export of timber for pit props, for which there is a demand in British colonies, and junk, of which there is plenty on Western Canadian farms and for which there is also a market in Great Britain.

The provision of intermediate storage sheds would undoubtedly go a long way towards popularizing the Hudson Bay route with wholesalers and retailers in the centres of at least two of the prairie provinces as it would enable them to combine shipments, break bulk at interior points and secure consignments in less than carload quantities at local points, provided the government is prepared to furnish such service at nominal cost for a period. It would also enable consignees to combine purchases and shipments on an economic basis.

Criticism Unwarranted

During the past few months smiting at the expense of the Hudson Bay route has been indulged in by some of the Eastern press, the inference being left that the system is somewhat of a white elephant, that it will be a long time, if ever, before it can stand on its own feet and that the East has had to bear the expense of its construction and is now called upon to finance its maintenance.

It is true that the railway is not yet paying its way, but the critics failed to point out that during the whole period it has been operating the west has been suffering from the combined shock of world economic depression with crop failures superimposed as an additional handicap, with the result that comparatively little export grain has been available for out-bound cargoes via the H.B. route and the purchasing ability for incoming commodities has been severely curtailed.

As for the East bearing the cost of construction, this inference was badly shattered when the On-to-the-Bay association drew to the attention of the Commission that 40 per cent. of the \$53,000,000 which the project including terminal facilities cost, was financed by the sale of Mid-Western lands collected in cash "and" to quote the brief, "as there is still over twenty millions unpaid on contracts, it is possible that a further substantial sum may be realized."

Live Interest Advisable

In view of the apparent anxiety on the part of some Eastern interests to hamper and perhaps decimate the Hudson Bay route it is important that the people of the west give close attention to the representations which have already been made, follow them up and see to it that their interest in the project is not lost sight of.

Letter From The Queen

Robert Cranston, of Caladonia, Ont., has received a letter from Queen Elizabeth acknowledging an unusual gift he sent her. Mr. Cranston made the gift, a wooden paper knife, from oak recovered from the battleship Mohawk sunk at the mouth of the Grand river in the war of 1812.

Copper comes from the word "Cyprus," which island was famous for its copper mine.

Praise For The People

Edna Jacques, Canadian poet, returned from a tour of the drought areas with praise for "the grandest people in the world." She told of one man at Brercrest, Sask., who got a good crop for the first time in his life. He had seven years, sold it for \$400 and came to church to place \$40 on the collection plate.

Hudson Maxim, inventor of Maximite and high explosives, was born on Feb. 3, 1853.

Noted War-Time Aviator

Captain Morley Carter Killed In Automobile Accident In Ontario

Captain Morley Carter, 49-year-old noted war-time flyer, killed in an automobile accident near Barrie, Ont., was buried in Orillia, with military and Masonic honors.

Capt. Carter enlisted in 1915 in the Royal Air Force. After training for several months he was sent to France for active flying and received decorations several times for distinguished service. He was one of four airmen sent to Italy to aid the Italians against the Germans and of the four was the only one to reach the scene.

After the war, Capt. Carter was with the Ontario air force patrolling the north and making government surveys. He was also connected with the Dominion and Saskatchewan air forces. A year ago he came east from Saskatchewan and has been with the Ontario air force since.

Should Advertise Wheat

Dr. Hind Advocates Fewer Acres And Larger Yields To Lower Production Cost

Canada should send experts to world wheat countries, particularly Russia, "to keep us posted," Dr. E. Cora Hind of Winnipeg, told the Women's Canadian Club at Toronto.

"Russia is, and may be, increasingly a menace to Canada in the wheat market of the world," she said, adding the world could do without Canadian wheat unless the price is right.

Dr. Hind, speaking after a two-year globe-trotting trip in which she visited 27 countries, declared Canadian wheat should be produced on fewer acres with larger yields per acre and at lower costs. It should be sold at the world price.

Canada, she said, should have more and better advertising in other countries.

"Aspirin" Trade Mark Protected

Bring Actions To Restrain Infringement And Secure Judgment

The Bayer Company Limited having brought actions to restrain infringement of its registered trade mark "Aspirin" the Exchequer Court of Canada has given judgment against its five defendants. In each case the defendants were perpetually restrained from using the name, brand, Joseph Nozick, Standard Bottlers and Packers Ltd., B. Neuman and Joe Beckman from using the trade mark "Aspirin" on preparations put out by themselves and awards the Bayer Company costs and damages.

The defendants were marketing the infringing product under various names, including Pioneer Sales Co., Western Sales Co., Western Distributing Co., Advance Specialty Co. and Acme Specialty Company. The tablets labelled "Aspirin" were not of Bayer manufacture and were packed in small envelopes, each containing three or four tablets, and mounted on cards.

It is the intention of The Bayer Company, Limited, to take every legal method to uphold its trade mark.

"Aspirin" is the trade mark of The Bayer Company, Limited, Windsor, Ontario.

Increase In Auto Sales

The Dominion bureau of statistics reported Canadian October sales of new motor vehicles totalled 5,847 units at \$6,552,261 against 4,021 at \$4,590,475 in October, 1936, an increase of 45.4 per cent. in number and 42.7 per cent. in value.

Compulsory military training is a custom among men of the Maasai, a people of East Africa.

Cork, being half air, is five times lighter than water.

Palestine Administration

Sir Harold Alfred MacMichael Has Received Appointment

Sir Harold Alfred MacMichael, veteran African administrator, was appointed high commissioner and commander-in-chief for Palestine and high commissioner for Trans-Jordan. He will succeed General Sir Arthur Grenfell Wauchope, whose resignation due to poor health was made known Oct. 28. The colonial office announced the new appointment would become effective at the end of February.

Sir Harold, governor and commander-in-chief of Tanganyika Territory, East Africa, since 1934, will succeed to the task of restoring peace to the Holy Land, where the long conflict of Arab and Jew has produced nearly two years of violence and bloodshed.

He has been in British government service in Africa 32 years and was intelligence and political officer of the British expedition which in November, 1916, recaptured Darfur, on the western Anglo-Egyptian Sudan, after a native uprising.

Appointment of Sir Harold MacMichael to succeed Sir Arthur Wauchope, announced in London, was generally well received in Jerusalem.

Arab circles declared Sir Harold's knowledge of Arabs and their language would be of great help to him in dealing with the Palestine problem. Jewish leaders gave assurance they would offer the high commissioner full co-operation in the task of pacifying the Holy Land.

ALICE STEVENS' RECIPES

WATCH TEMPERATURES IN DEEP-FAT FRYING

Doughnuts belong to the colder winter months. They are frowned upon by many people because they are considered hard to digest. They are really not an ideal food for children or invalids but an active person can digest doughnuts if they have been properly made and are eaten in moderation.

The temperature of the fat is most important. If the fat is too cold the doughnuts become soaked with fat. If the fat becomes too hot, it compounds. It should not be smoking hot.

Test the temperature with a little of the uncooked doughnut mixture or with a little bread. A small cube of bread should turn a golden brown in 60 seconds, if raw foods are to be cooked.

The kettle for deep-fat frying should be deep and should be of heavy material. An iron one is best. It takes a long time to heat up but once the pan and fat are heated through they remain at a uniform temperature.

If the fat has been used several times, it is wise to clarify it. Add a few slices of raw potatoes and heat gradually. The potato will absorb the impurities. Strain the oil through the hot fat through a cloth over a strainer. This removes all the solid particles and pieces of burned food.

Lard is used a good deal for deep-fat frying. Some of the lard substitutes made of vegetable oils are even more satisfactory but a combination is advised. Fat rendered from animal sources is better.

While you have a quantity of fat on hand for deep-fat frying, why not try some fritters. They are a variation of doughnuts and are cooked in the same manner. Dredge fruit may be added to the fritter batter.

APPLE FRITTERS

1 cup flour
1 1/2 tablespoons baking powder
3 tablespoons sugar
1/4 teaspoon salt
1/2 cup milk
4 eggs

Mix and sift the dry ingredients, beat the egg and add the milk. Stir the wet ingredients into the dry ones. Add the apple which has been cut into small pieces. Drop by spoonful into the hot fat and fry like doughnuts.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Deserved The Fine

A splashing motorist at Ripley, Derbyshire, drove through a pool of water at the side of the road and splashed two persons with muddy water, one of them a policeman in plain clothes. In court the motorist was fined 15s. and his license endorsed for driving without reasonable consideration for other persons using the road.

A Frenchman, Nicholas Appert, is known as the father of the tin can. The hermetically sealed container was invented by him in 1809 in order to feed the French army.

TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

ARTICLE NO. 2

A Cure For Cancer?

The doctor is frequently asked by the laity if any progress is being made towards a cure for cancer. It is apparent that the majority of people regard cancer as a single disease, much the same in this regard as tuberculosis. This attitude is encouraged by the constant search in the laboratories of the world for a real cause of cancer. If there is a single cause of cancer it is reasonable to assume that there may be a single remedy for the affection.

What Are The Prospects For Such A Discovery?

From what is known of the cause of cancer it is generally agreed that the change of a healthy cell or group of cells in the body to cancer is caused by something within the cells themselves. This change of an orderly regulated pattern to one of riot, may be modified by heredity; by electrical, chemical or other change in the body and by external irritation from a great variety of substances. It may well be, indeed it is more than likely, that the agents mentioned incite changes in the cell which encourage the growth of cancer.

From the foregoing, which forms a group of well-authenticated facts, it is apparent that there is no single cause of cancer. In view of this it is improbable, though not certain, that cancer is a single disease.

Eliminate The Causes

Even if this is true one need not be discouraged. Knowing the many predisposing causes of cancer, the first objective is to eliminate these causes as far as possible. A great deal can be done in this direction. No longer need workers in X-ray and radium; workers in tar and shale oil; fear cancer from these agents. Meticulous hygiene and moderation in the use of tobacco would prevent many cancers of the lips and mouth cavity. Syphilis, a frequent excitant of cancer, can be controlled. Knowledge of the early signs of cancerous and pre-cancerous conditions would aid the victim for observation at an early date when the prospect for prevention and cure are the maximum. Exposure to tropical sun, to sand storms and winds, to excessive supervision and habits of life provocative of irritation may all be avoided. Regular periodical medical examination would serve to catch a lot of cancers in the making and save countless lives.

Prospect For A Single Cure Not Promising

No, the prospect for a single universal cure for cancer is not reassuring. It may come, but in the meantime, the cures we have are reasonably good. The pity of it is that these cures are not fully taken advantage of. In a host of cases they are used too late. Cancer in the early stage is curable.

Next article: Cancer and Fear.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 165 Bond St., Toronto, Ont.

Scientists have revealed that apple pie loses the fruit's vitamins. The anti-cancer substance in fruits and vegetables, Vitamin C, decreases about 80 per cent. when apples are made into pie.

Vast Statue Of Britannia Will Command Entrance To Boulogne Inner Harbor

Early next spring, on a date yet to be determined, the vast statue of Britannia, which is to command the entrance of the inner harbor of Boulogne, will be unveiled with appropriate ceremonies.

This statue will be visible for miles around; it will be nearly 100 feet high from the base to the tip of the trident held aloft. Britannia's shield will be nearly 10 feet in diameter, and will be of beaten brass gilded in gold leaf. The whole of the figure has been made out of six enormous blocks, that used for the head weighing 23 tons before carving. A stone from each of the British Dominions has been included in the base.

As they pass to and from the Channel, travellers will see this statue, somewhat in the same manner as "Liberty" is seen in New York. Britannia is intended as a symbol of the past and present friendship of the two democracies.

The sculptor is Felix Desruelles. His conception is that of a Britannia completely armed and ready, but calm and serene and confident in her strength and her right. She has a scarf, emblem of her command of the seas, gracefully draped around her shoulders.

"My Britannia," declares M. Desruelles, "is intended to be an artistic embodiment of the robust and gallant British race, modest in her own unassuming before the great sacrifice, and prepared to give lavishly her gold and her life."—Bulletin of the Railways of France.

Growing In Importance

Chick Hatchery Business In Canada Becoming Valuable

The importance and volume which the chick hatchery business has assumed in Canada in the last few years may not be generally appreciated. During the 1937 hatching season, 12,900,000 chicks were produced and sold by over 500 breeders and hatcheries operating under the Record of Performance and Hatchery Approval Policies, administered by the Dominion Department of Agriculture. To produce these chicks, 15,500,000 eggs were set, enough to fill 335 freight cars and make a train over one mile long. All of these eggs were produced by flocks which had been culled, that is, the poor birds as regards egg production or meat type removed. Practically all of these flocks were also blood-tested as an insurance against outbreak of poult disease in the offspring. A large number of flocks were held under Record of Performance males—males whose female ancestors for two or more generations had laid over two hundred two-ounce eggs per year.

Noted Friendly Attitude

Lord Cecil Comments On His Visit To United States

The friendly attitude prevalent in the United States toward Great Britain was commented upon by Viscount Cecil of Chelwood on his return to England from a visit to Canada and the United States.

Arriving aboard the Berengaria, he said he had "found the greatest friendliness toward this country and toward those things for which this country stands."

"There is the greatest interest in foreign politics in America at the present time," he added. "More people are coming to the belief that international co-operation is the only way out of international questions."

Referring to recent international talks, Lord Cecil remarked that "the peace prize" said "anything that improves the relationship between this country and other countries, especially with France with whom we have worked so many years, is all to the good."

Lucky Charm Popular

More than 200,000 "lucky charms" are sold every year in New South Wales. "Nine out of ten people in all walks of life are wearers of charms," one dealer said. "They go out of fashion like women's hats, and new charms are manufactured to take their place."

Secret Of Popularity

New York Doctor Made Friends Of Patients And Staff

What it takes to be "the most sought-after" doctor in the greatest city of the United States is told by a physician in a new book, "Harlow Brooks, Man and Doctor."

Harlow Brooks, who died last year, was the doctor more sought after than any other in New York city. The qualities he used to help his intimate friend, Dr. John J. Moorehead, writer of the book.

Dr. Brooks was a genius for making friends among patients and staff. Even the captain of a ferryboat on which Dr. Brooks rode nearly every day never failed to put back to the dock if he saw Dr. Brooks arriving too late to catch the boat.

He not only checked a patient's personal history but the history of his family as well. He really liked people, Dr. Moorehead said, and added:

"Time and again I have seen him glancing around a patient's room for some indication as to the person's character or interests."

He had the ability to get wayward children to come and see him and to reinter them in their parents. He had kindly ruses to get husbands whose wives were worried about them to see a doctor.

He put the study of a patient as a human being ahead of the findings which might be made by test tube, microscope slide, and other apparatus, although he, himself, was one of the leaders in developing the scientific and laboratory side of medicine.

Predicts Cutworm Outbreak

Infestation Of Pask Western Cutworms, In Saskatchewan

Most severe infestation of pale western cutworms yet experienced on the prairie is forecast by K. M. King, federal government entomologist at Saskatoon. In an organized survey of the cutworm population, it has been found that the entire west section of Saskatchewan, as far north as Macklin and as far east as a point on the U.S. boundary directly south of Moose Jaw, is infested. In most of this area the infestation is severe and in a strip running from the south central region toward the west central part of the province the situation appears serious.

Wherever there was a crop in the southwest next spring, the outbreak would be bad, Mr. King predicted, although the weather might help control the pest.

Mr. King advised early cultivation and late seeding as a means of controlling the worms.

Locomotive Fuel Costs

Average \$20.04 Every Hundred Miles For Passenger Engines

A passenger locomotive on a Canadian railway will haul a train 100 miles at a full cost of \$20.04. That was the average in 1935; the cost was a little less in each of the five preceding years. So when a motorist pays \$1.35 for the necessary five gallons of gasoline to fuel a small car for 100 miles, he is not getting much a bargain, after all.

Freight locomotives in the year mentioned averaged \$34.92 per hundred miles for fuel; switching engines, \$20.28. They burn chiefly bituminous coal, average cost, \$4.50 a ton, which in 1935 was at \$26.33-312. The oil-burners consumed 48,956,800 gallons, which sounds formidable but represents only \$1,404,468 in cash. We may not have any wood-burning locomotives, strictly speaking, but wood is used for starting fires, to the extent of \$1,534,048 in a year, and gasoline used for fuel by the rail motorcars was valued at \$97,092. The total fuel bill of all Canadian lines in 1935 was \$27,867,440.—Barada Canadian Observer.

Teacher—"A fool can ask questions that a wise man can't answer." Johnnie—"No wonder we failed in our examination!"

King Leopold III, of Belgium, is 36 years old.

Invented By Canadian

Treatment Cures Men Who Were Gassed During Great War

The following article is from The People, London: Tomorrow is a day of new hope for thousands of ex-soldiers who, nearly 20 years after the Great War, are still suffering from the effects of gas poisoning.

With the opening of a clinic in London, a battery of secret machines will begin curing men who five years have sought relief in vain.

General Sir Hubert Gough, friend of ex-soldiers, heard of John Lewis Marchant, 42-year-old, Walsingham, Thames motor machine, who, ever since he was demobilized, suffered the distress of asthma.

Marchant could not lie down, dare not go to bed, and for 15 years had to snatch whatever rest he could in a chair.

To-day he is a new man—cured after he had given up hope!

Miss Barbara Beresford, honorary secretary of the society for providing free treatment of respiratory diseases, told me:

"General Gough, our chairman, arranged for Marchant to try the Duke-Fugard Treatment. News of his complete recovery brought many letters from ex-soldier sufferers."

"It is to cure them that we are opening this new clinic at 32 Uxbridge Road, Ealing, London."

"Already we have clinics working full time at Glasgow and Manchester and another is to be opened in Scotland."

"Cases which have baffled Harley street specialists have been cured by the treatment which was invented by a Canadian chemist and perfected by his American nephew."

"Treatment is given by a small machine which resembles a wireless set. Air, sucked into the apparatus by an electric fan, is electrically heated and driven over 12 trays of medication which it picks up in invisible form."

"Patients in sealed rooms breathe the air, which kills the germs in their lungs."

Repairing Famous Monument

Done Of Taj Mahal Will Be Made Damp-Proof

Plans to seal the dome of the 900-year-old Taj Mahal in Agra, India, damp-proof are under consideration by the authorities. While there appears to be no danger of the great dome in the centre of the famous white marble mausoleum giving way, carved stucco placed on it in recent years have added greatly to its weight and may be removed.

Concrete added to the original roofing has not achieved the main purpose of making it damp-proof to the extent anticipated. The great monument, one of the world's most beautiful buildings, was recently inspected by Rao Bahadur Dikshit, Director-General of Archaeology.

The only man who ever had two models of automobiles named after him was R. E. Olds—the Oldsmobile and then the Rao, which got its name from his initials.

Faith In Western Canada In Spite Of Serious Set-Backs Occurring In Recent Years

A State Of Mind

Farm And Cattleman Are Only Famed Within Canada

Mrs. Amy Johnson Molison, after an exciting and spectacular career as an aviator, says she wants peace and quiet. She has gone into the English countryside to find it.

Environment may have something to do with it, but primarily peace, quiet and contentment is a state of mind. It is not a question of solitude; it comes from within. It can be enjoyed in a crowded apartment of a crowded city; it may be longed for in a country cottage nestling in a pretty woodland and a placid stream running by.

Riches and contentment, someone has said, come, not from the multitude of our possessions but from the fervour of our wants. We cannot get peace and quiet if we are constantly striving for the things that are beyond us. If we do not over-desire our incomes, nor wish to do so, if we do not yearn for social or business conquests, or for adventures beyond our strength, then we can be happy.

For people are often happier than rich because so long as they have enough to live on comfortably, a job and friends around them they have all that they reasonably expect out of life. People who have money to indulge themselves in luxuries, or who have had opportunities of living adventurous lives, may pine for more money, more ventures, and they never have peace of mind. There are more neurotics among the well-to-do than among the poor.

A popular song of many years ago had it that "A merry heart is a purse well-lined." That is just another way of saying that it is better to be content than rich. And after all, that is the issue in which most people are rich.—St. Thomas Times-Journal.

Motorists Boycott Bridge

Roads Leading To New Structure In Scotland Not Good

Although it reduces the distance between Glasgow and Fife fully 10 miles, Scotland's new \$1,750,000 wonder bridge over the Firth of Forth at Kinross is being boycotted by motorists. Automobile drivers are taking the longer route through Stirling, and gentlemen at the notorious Stirling bottlenecks are as great as ever. The motorists, however, declare that they will not use the new bridge until the bad roads approaching it on the Stirlingshire side are improved.

Landlady: "You seem very hard to please, Mr. Simpson."

Locals: "How's that?"

Landlady: "Well, more than a dozen boarders have used that towel to-day—and you're the first one to complain about it."

Stitch These! The More the Merrier

You've no idea what fun it is to stitch these bright and cheery little towels that run in to the house! Make a set for each of your friends and you'll thoroughly enjoy the gay note these little items bring to their household tasks. Use bright blue for the eight-to-the-inch cross-stitch, the gayest of these towels, and the more you make, the more you'll enjoy it. It will add a transfer pattern of seven motifs averaging 8 1/2 x 11 inches; illustrations of stitches used; material requirements; color suggestions. To obtain the pattern and 20 cents in stamps or cash (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

It is unfortunate that recent drought years in Western Canada have coincided with a period during which the price of wheat and other grains has been very low. Partly owing to a temporary surplus produced by unusually large crops immediately before 1923, partly from a false alarm created over alleged world overproduction of wheat, partly as the consequence of excessive nationalistic policies in normal grain-importing countries and partly as part of a general break in all commodity prices some years ago, there has existed a condition in Western Canada in which crops which were unusually small have had to be sold at unusually low prices. Though it is not my intention to make any forecast on the course of wheat prices, I may point out that much of that economic suffering in Western Canada which is charged to drought has resulted from exceptionally low wheat prices. This year, owing to the unusual distribution of the rainfall, two large sections of the Prairie Provinces have produced ample yields per acre and, with the present prices for wheat, the farmers of these areas are in receipt of entirely satisfactory incomes.

A survey of Western Canada has just brought out the fact that the rural population is actually increasing; this at a time when the greatest pessimism concerning its future has existed in other quarters. The picture of Western Canada as a desert inhabited by unfortunate and broken-hearted paupers is the greatest travesty possible. It is, in fact, a community of courageous men and women, which has suffered serious economic difficulties, but in which most of the people still maintain a convinced faith in their destiny.

I have previously mentioned that an increasing number of the farmers were actually born in Western Canada. These enterprising and progressive people have a deep-rooted faith in the country which is their home, and I have no hesitation whatever in saying that the great majority of them will remain very deeply the campaign of propaganda carried on to prove that they are unfortunate sufferers whose lot can be alleviated only by moving them away from their homes.—By Sir Edward Beatty in the London Times.

Sampled Oriental Delicacy

Toronto Woman Found 1,000-Year-Old Eggs Palatable

Eggs 1,000 years old were sampled by Mrs. G. Ernest Forbes of Toronto, when on a recent visit to the Orient. The Montreal Women's Club, before whom Mrs. Forbes was speaking, was given the recipe: Take fresh eggs, dip them in a solution of lime; when coated with the plaster, bury them in soft mud. When disturbed, she said, they resemble coffee grains and they then are sliced thin.

"They are not really bad," she commented as the audience laughed. A Chinese dish, recommended to Canadian housewives as "white meat of chicken with white of egg."

The great desire for education is a notable feature of life in the Orient, said Mrs. Forbes. Women in Japan find it difficult to enter the universities, although there are women's colleges in that country and those who wish to acquire the highest qualifications have to come to the United States or Canada to study. They succeed in easily well in western universities and take positions of leadership after return to their own communities, once they have lived down suspicion that they may have deserted the ways of their own country.

Mrs. Forbes touched on the professional training given women in the University at Chengtu, in West China, and of the tremendous benefits these women are able to render their communities after graduation.

The youngster was going to a party.

"Now, dear," said the mother, "what are you going to do when you've had enough to eat?"

Replied the youngster: "Come home."

IT'S THE NITE BEFORE CHRISTMAS—

And all through the land
"Roll Your Owns" are hoping
they'll get this gift grand—
Ogden's Fine Cut indeed is a
gift without peer,
And it's wrapped in a way
that suggests Christmas cheer!

½ lb. tin 75¢

In a colourful wrapper for
Christmas giving.

OGDEN'S

FINE CUT

WORLD HAPPENINGS BRIEFLY TOLD

Sir Francis Acland, Liberal member of parliament, quit the Church of England in protest against its attitude on divorce.

Dr. Alexander Alekhine of Paris won the world's chess championship by defeating Dr. Max Euwe, Amsterdam, who won the title from Dr. Alekhine in 1935.

It was reported Hugh R. Wilson, assistant secretary of state, soon will be appointed U.S. ambassador to Germany to replace William E. Dodd.

Sonja Henie, queen of the ice and Norway's latest contribution to motion picture stardom, was made a Knight of Saint Olaf, by King Haakon.

Queen Elizabeth and Princess Elizabeth are working on a sampler designed by Lady Smith-Dorrien of the Royal School of Needlework, depicting scenes of the Coronation.

The farm placement scheme, bush work and removal from relief of physically fit single men has resulted in decrease of unemployed single men in Winnipeg to the 1934 low point, smallest since the depression.

Last year Saskatchewan produced 14,971,609 pounds of copper, an increase of more than 2,000,000 pounds over the year previous. The money value of the 1936 production was \$1,418,850.

Reasons for the comparative immunity of Canadian and United States cattle to foot-and-mouth disease will shortly be investigated by representatives of the agriculture ministry, Penatons Minister Herwald Ramsbotham told the British House of Commons.

The United States bureau of agricultural economics estimated the new Argentine wheat crop at 175,000,000 to 185,000,000 bushels. Prior to recent frosts, a yield of approximately 230,000,000 bushels was forecast. Last years crop was 249,193,000 bushels.

Must Find Something Else

Conjurors and clowns in Germany may no longer use eggs, milk, or other edible ingredients for their tricks or jokes, according to a decree issued by the Reich's Theatre Chamber. The order is intended to aid the Four Year Plan in rendering Germany self-sufficient in its food supply. Another regulation forbids conjurors to explain how their tricks are done.

Sometimes chimney swifts fly with alternate wing beats.

MAKE DAUGHTER'S JUMPER FROCK IN PLAIN OR DRESSY FABRICS

By Anne Adams

If you want to dress your child in the very latest style and still stay on the practical side, make her this smart little Jumper Dress. Checked or plain gingham or one of the Scotch plaid wools make a very smart jumper and they wash so easily. When worn with the fresh white blouse (easy to launder) it will keep your child in the high style and save you a lot of work. Just a few straight seams to sew up and you'll have made a dress that will go gaily to school or joyously to a party, depending on the fabric you choose.

Pattern 4658 is available in children's sizes 2, 4, 6, 8, 10 and 12. Size 6 blouse, takes ½ yard 36 inch fabric; jumper, 1½ yards 64 inch fabric. Illustrated step-by-step sewing instructions included with the pattern.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Miss, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newsprint Division, 175 McDermot Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON

DECEMBER 10

THE BIRTH OF JESUS

Golden text: There is born to you this day in the city of David a Saviour, who is Christ the Lord, Luke 2:11.

Lesson: Luke 2:1-20.

Devotional reading: Isaiah 9:1-7.

Explanations And Comments

The Birth of Jesus at Bethlehem, Luke 2:1-7. Caesar had ordered the enrolment of everyone in the Roman Empire, and the people of Palestine went "each to his own city" to be enrolled. Mary and Joseph went from Nazareth to Bethlehem, the home of David, their ancestor. There Jesus was born and Mary laid him in a manger, for there was no room in the inn for the weary travellers.

The Story of the Shepherds and the Angels, Luke 2:8-14. There were shepherds in the fields near Bethlehem, watching their flocks on the night that Jesus was born. "Be not afraid," were the first words of the angelic chorus they heard. "The Babe who was born that night became the great Easter-child of fear. Our lesson a few Sundays ago proclaimed his message, 'Learn of me, and you shall find rest, peace, unto your souls'."

"For behold, I bring you good tidings of great joy which shall be to all the people, and this was the good tidings: 'There is born to you this day in the city of David a Saviour, who is Christ the Lord.' The word 'Christ' means 'The Anointed One,' and is the title of Jesus as the One consecrated to be the Redeemer of the world."

"And this is the sign unto you: Ye shall find a babe wrapped in swaddling clothes, and lying in a manger." The swaddling clothes were the bands of cloth which the Oriental mother wraps tightly around the body of her babe, confining legs and arms. The "sign" was in the unexpected circumstance of the Babe being cradled in a manger. Suddenly a multitude of the heavenly host appeared praising God and saying, "Glory to God in the highest, and on earth peace among men in whom he is well pleased." The sentence epitomizes the Christian faith and sums up Christ-like living. Glory to God is exemplified in an upright life, peace on earth is the expression of a sublime and sensitive humanity.

Not A National Habit

Ice cream eating can hardly be considered a national habit in the United States. G. W. Hemericks, Washington, D.C., told the annual convention of the Ontario Association of Ice Cream Manufacturers held at Toronto. The 250,000,000 gallons manufactured every year, he said, averaged only 13 pints a year for each person.

New filling station pumps in England enable motorists to buy a quarter's worth of gasoline instead of 30 many gallons.

Tides in the Bay of Fundy rise to a height of 70 feet.

FLIN FLON

"The Story of Its Finding and Position To-day"

By FRATT KUHN

To Creighton and his prospecting friends also, goes the credit for the discovery, early in January, 1915, which culminated after many vexatious delays, in Manitoba's first commercial mining enterprise, when the Flin Flon mine, under the management of the Hudson Bay Mining and Smelting Co., came into production in November, 1920, as Canada's third largest metallurgical enterprise.

If prospecting had not been profitable, trapping and, while camped at the outlet of Phantom Lake, near the present site of Flin Flon, Tom Creighton, early in January, 1915, was looking for meat for his party. He saw some young Willows and noose feed so started trailing along looking for moose sign. He worked his way uphill over a hump and as he got to the top he discovered a lake in the distance he hadn't known was there.

Curiosity led him to investigate and at the edge of the lake he discovered a spot "uncovered of snow which showed chalcocypic in the schist."

He marked the spot which he could not thoroughly examine at the time, and early in the spring of 1915 he returned and found pieces of ore projecting through the ice at the shore, which brought the firm resolve to investigate it in a characteristic, thorough manner, when the spring break-up occurred.

During the winter of 1915, Dan Mosher, unknown to his colleagues, came to Toronto and approached Jack Hammill for a grubstake, forming the Mosher-Hammill Syndicate for further prospecting in the area.

Hammill, a native of Beeton, Ontario, had found express on for his dynamic personality—many mining camps where he became a colorful figure, ever ready to assume responsibility and to conclusion those jobs which offered seemingly impossible obstacles. His loquacious, genial personality won for him an enviable reputation among the mining fraternity. Financial associates of Hammill in the syndicate were Alex. Pasken, Toronto solicitor, financier and mining executive, Frank Currie, hotel keeper, and Hugh Ryan. Each had a one-eighth interest in the syndicate, but Hammill acquired Ryan's interest later. The other half interest in the syndicate was shared by Tom Creighton, Dan Mosher, John Mosher, Leon Dion, Isadore Dion and Dan Milligan.

When Dan Mosher came back to Beeton Lake from Toronto, bringing supplies for a season's prospecting by the party, and an agreement with the Mosher-Hammill Syndicate, the plans of Creighton and his friends to finance the ore own grubstake had to be considered. Dan Mosher, in good faith, had gone so far with his plans that it left no alternative but that the other five of the syndicate.

After the spring break-up, Creighton and John Mosher went in to size up Creighton's discovery of the win-

ter before. Convinced that it was a large ore body, containing copper, zinc, gold and silver, they staked its claims, the extent of their homes, and hurried back to the syndicate base at Beeton Lake to get the rest of their party and their horses, in order that more claims might be staked.

They Found A Book A Well As A Mine—Read How Well This Worked Out!

As if a sympathetic genius had conspired to aid them, a name for the discovery was already at hand. Months before the party had picked up the remnants of a paper backed novel on a portage on the Churchill River, where the pioneer had left behind his load. "The Sunless City" was the title of this, English dime novel and the leading character was Josiah Flintababy Flonah, Esq. contracted by the prospectors to "Flin Flon." It told of a subterranean domain where gold was so plentiful that it was literally a base metal, truly the mecca sought by all prospectors. The coincidence of stumbling upon such a fanciful tale by the prospectors seemed almost incredible, more so because the concluding pages of the novel had been torn off but its finders were not to know the hole through which Flin Flon reached the earth's surface, but by a strange coincidence there was a conical shaped hole ten feet in diameter and several feet deep adjacent to the number one Flin Flon shaft was sunk. At the bottom of this hole Creighton got some rich pieces of ore, but he was concerned from the surrounding leached ore, and he laughingly remarked that "old Flin Flon must have shaken his gold-dust laden whiskers when he emerged from 'The Sunless City.' I'll tell you more of this work later, but here was a perfect name for their discovery—"Flin Flon."

I Discovered Tom Creighton In A Shower Bath!

"I have gone over all of these facts with Tom Creighton himself, and he verified them as correct, after changing some details."

Funny thing, too, how I met Tom by pure accident. I was having a shower early in the morning and had just moved out for a rub-down when another chap is stopped under the shower. When he came out I was telling him what a marvellous place Flin Flon had grown into and he remarked, "I've been down in the mine and all through the upper works, smelters, etc., but I do wish I could find Tom Creighton. Down in Toronto they told me he lived in Winnipeg but I looked there and couldn't find him. Up here they say he hasn't been around since 1930. What a lock he'd get out of this development."

Now get the picture. Here were two perfect strangers, enjoying a shower and a rub, with the newspaper man doing all the talking. Did he get it? Did he get it? The other man said, "I'm Tom Creighton," and he was!

"Next day he was away in his canoe again, prospecting with Bert Lacey—but my three-hour conversation with Tom that night was another story. We must keep on with the orderly development of the Flin Flon after its finding and naming."

This story started last week. Next issue real action starts. The Flin Flon before such a prospect exists.

In 1916 Flin Flon Camp looked like this.

For After Dinner Speakers

After Ten Minutes

An electrical device designed to limit after-dinner speaking to ten minutes has been installed in Kent, England. It consists of a large face clock with a protruding tongue which, when the speaker begins, starts moving. After eight minutes one of the eyes winks a warning; and if the speaker overruns ten minutes the apparatus throws the whole room into darkness, giving listeners an opportunity to sneak out quietly without embarrassment.—Vancouver Sun.

Two young brothers were arguing. Said the elder, to check what he had been saying: "I ought to know, don't I go to school, stupid?"

"Yes," replied the other, "and you come home stupid!"

No Prejudice

Many Nationalities Living Together

In Harmony

Isn't the Soo a wonderful place? Here good sense and good will among our many races prevails. We have Anglo-Saxons, Italians, Austrians, French, Germans, Poles, Finns, Indians and other peoples living in peace together, enjoying equal opportunity and tolerant of each other's views. And as the years go by, race lines are disappearing. We recover the good points in our neighbor and give him credit for them, for we see that he is doing his best to contribute to good Canadian citizenship. No man suffers because of his race or religion, and he is treated on his merits as a man. We have discovered in fact that to have friends we must be one.—Sault Ste. Marie Star.

CANADA NEEDS TO PUSH SALES ON BRITISH MARKET

Ottawa.—Present methods of merchandising Canadian farm products in the United Kingdom were criticized in the report of A. M. Shaw, director of marketing service, to Agriculture Minister Gardiner.

The director, who headed a party of Canadian agriculturists on an extensive survey of the British market last summer, found Canadian products under a handicap in British markets compared to those of other Dominions and some foreign countries.

Mr. Shaw made three general recommendations and a number of specific suggestions. He reviewed the present position and prospects of all Canadian agricultural products except cereal, in the British market, touching on dairy products, livestock, meats, eggs, poultry, fruit, vegetables, maple syrup and sugar, tobacco, furs, hay, grass seed and honey.

General recommendations were: "The first step is to see that Canada sets her own house in order by ensuring, as far as possible, that no merchandise unsuitable for export be exported and that goods which are exported be improved in quality, packaging and labelling.

"The second step is to work upon importers, brokers and the trade in the United Kingdom, impressing them with the quality of Canadian products, improving distribution and seeing that Canadian products are identified as such to the fullest possible extent.

"The third step is to undertake a publicity campaign directed to the British housewife."

Six specific suggestions proposed for serious consideration follow:

"Canada should adopt a national mark for high-grade products shipped to the United Kingdom;

"Use of this mark should be made compulsory on specified products provided they attain the requisite standard and the mark should be made the focal point for advertising and publicity calculated to give it a definite value and significance;

"Where use of the mark is not compulsory the right to use it should be accorded only to producers under a license when the products attained the requisite standard;

"Under proper safeguards use of the mark should be extended to Dominion importers or blenders who import Canadian products in bulk and package or blend themselves;

"The mark might be either an emblem or a label so designed that it can be readily identified by the British housewife."

For the export of sub-standard products, the word "Empire" should be substituted for "Canada" on the labels and regulations might be made limiting the size of type that might be used to show Canadian origin.

"Canada has not benefited to any noticeable degree from advertising done in the past," Mr. Shaw found, "whereas New Zealand, Australia and South Africa have achieved definitely favorable results. New Zealand is the best-known supplier of foodstuffs among the Dominions, Australia comes next, followed by South Africa and Canada.

"Canada's advertising and promotional activities have lacked three principal essentials: A definite long-term plan which can be carried out regardless of temporary shortages of supply; regard for enforcement of grading regulations in certain lines and qualified merchandising officials familiar with Canadian agricultural commodities and their production, to co-ordinate or promote the efforts of our producers to keep abreast of market changes."

As a rule British retail stores do not feature Canadian food products, the report said, whereas products of other Dominions are featured regularly. The British consumer is unaware of any special qualities of Canadian farm produce.

London and district is the best present market for Canadian products because most Canadian imports arrive at that port. Canadian cheese in London is considered the most desirable of all imported cheeses and Canadian bacon is gaining in favor on Danish and Irish hams.

Awkward Questions

Eden Answers Inquiries About Sino-Japanese Conflict

London.—Foreign Secretary Eden answered a barrage of questions in the House of Commons on the fast-developing Sino-Japanese conflict.

Britain cannot, lodge protests with Viscount Kikujiro Ichi, Japanese "good-will" ambassador, over recent attacks against British soldiers and nationals committed by the Japanese in China, since the viscount is here on a purely personal visit, Mr. Eden declared in answer to one question.

Viscount Ichi, who arrived after his trips to Paris and Rome, was received at the foreign office by Mr. Eden. The Japanese ambassador to London, Shigeru Yoshida, accompanied him.

Mr. Eden told the house representations have been made through Sir Robert Craigie, British ambassador to Tokyo, "who is the proper channel."

Concerning the taking over of the Shanghai customs offices by Japan, the foreign secretary said representations had been made through official channels in Tokyo last month and that the Japanese foreign office gave assurances that "due consideration would be given to the views of foreign powers."

Ready To Be Rescued

Soviet Explorers Have Floated 745 Miles On Ice Floe

Moscow.—Four Soviet explorers drifting from the North Pole toward the Atlantic indicated they were ready to be rescued as their ice floe approached possible danger.

In the 200 days since they landed at the top of the world, the campers have floated 745 miles and reached the position 82.23 degrees north and 6.52 degrees west—off northeast Greenland.

Otto Schmidt, bearded chief of the Soviet Arctic venture, has indicated the men may be taken off the ice in January, when it is estimated they will have reached a point between Greenland and Spitzbergen.

Ivan Papanin, chief of the camp, reported by wireless that the campers "won't be ashamed to return to the mainland since we have collected much valuable data."

Served In Sudanese War

Penticton, B.C.—Funeral services with full military honors were held for Joseph John Hockley, 70-year-old veteran of the Sudanese war. Under the enlisted name of Joseph Low, Hockley was a member of the British relief party sent to Sudan in 1884 to relieve General Gordon at Khartoum.

Having Long Holiday

Montreal.—Main shops of the Canadian National Railways through-out Canada will be closed from Friday, Dec. 24, until Monday morning, Jan. 3, when work will be resumed, C.N.R. officials here announced. The holiday covers a period of six working days.

RESIGNS

Field Marshal Sir Cyril Deverell, one of Britain's outstanding tacticians, who has resigned as Chief of the Imperial General Staff following a drastic shake-up of the high command. He is succeeded by Major-General Viscount Gort, V.C.

Celebrates Golden Jubilee

Winnipeg Grain Exchange Has Been Operating For Fifty Years

Winnipeg.—The busy trading room of the sixth floor of the Winnipeg Grain Exchange building which has hummed for 20 years, was almost silent at noon, Dec. 8, when President Henry Gaiser paid tribute to prairie pioneers who gathered in a basement room of the hall 50 years ago to buy and sell grain.

The big bell in the trading room which has started and ended dealings in millions of bushels of grain, chimed at noon to mark the golden jubilee of the first exchange session held Dec. 7, 1887. From then the exchange has grown to be one of the world's largest grain markets.

Shortage Of Navy Men

Crews Not Available For Britain's Fast-Growing Fleet

London.—Great Britain is in "core need" of crews to man her fast-growing fleet, the naval correspondent of the Daily Express (Independent) declared.

"Thirty-two ships have been completed this year," he wrote, "and the demands were so urgent for crews that the commander-in-chief of Devonport had to announce that even men who are due to retire in two or three months cannot spare the time to undergo vocational training until the month before leaving service."

Fuel For Japanese Navy

Berlin.—Material for a plan to extract oil at Fushun, Manchoukuo, from coal mined in that area is being furnished by one of Krupp's branches, the German armaments firm house organ revealed. "The article predicted the project might make the Japanese navy completely independent of foreign fuel supply sources within a year."

For Balanced Budget

Ottawa Expects Near Balance Between Revenues And Expenditures

Ottawa.—Finance Minister Dunning, engaged in his annual task of preparing the 1938 budget, has been receiving the customary delegations from those industries seeking tariff and taxation changes designed to benefit them. To all of these the finance minister can only give assurance of his careful consideration.

Callers at Mr. Dunning's office included the brewery interests who annually make a submission. On this occasion they urged a reduction in the six per cent. excise tax on malt.

Last year the budget, brought down Feb. 23, contained the new agreement with the United Kingdom. It has been forecast the next budget will contain the revised Canada-United States agreement but there is no official confirmation.

Parliament is expected to meet no later than the last Thursday in January. All indications point to near achievement of a balance between total revenues and total expenditures.

At the end of October, completing seven months of the fiscal year, total revenues were \$319,000,000 compared with \$268,000,000 for the same period in 1936. Disbursements for the same period were \$286,000,000 compared with \$330,000,000.

Arctic Moonlight Flights

Sir Hubert Wilkins To Search For Missing Russian Aviators

Barrow, Alaska.—Sir Hubert Wilkins outlined plans for his proposed "moonlight flight" over white Arctic fastness in search of the Soviet transpolar flyers missing since Aug. 13.

"I expect to make flights with the next December full moon, which should be made Dec. 15," he said.

The contemplated moonlight search will start four months from the time Sigismund Levanefsky and five companions last were heard from after their attempted flight from Moscow to Fairbanks, Alaska.

Wilkins said there has been a light snowfall this year, with polar bears being found much farther north than usual. This, he observed, would indicate there would be wild life on which the missing men, if still alive, could survive.

Paying Debt Installment

Finland Not Defaulting On War Debt To United States

Washington.—Finland took steps to preserve its record for prompt payment of its war debt to the United States, notifying the American government it would meet the December installment of \$252,143 when due.

Of 13 war debt nations which together will owe \$1,680,170,447 this month, Finland alone has not defaulted in the past. The other 12 have been in default since 1933.

WHEAT BOARD HAS DISPOSED OF ALL SURPLUS GRAIN

Ottawa.—Trade Minister Euler disclosed the Canadian wheat board had disposed of all the wheat it held, having reduced to nothing in two years an accumulated carryover of 200,000,000 bushels it inherited in 1935.

Not sure of exact figures, which he did not have available, Mr. Euler said he believed the board held lately 7,000,000 bushels of wheat futures and that it converted these to cash wheat, distributing them afterward as seed and feed.

Rising wheat prices in 1935, '36 and '37 relieved the board of the obligation of buying wheat at the guaranteed minimum price of 87½ cents a bushel.

Simultaneously the board was able to unload gradually stocks of 200,000,000 bushels which had accumulated since 1930 when the government, through John I. McFarland, subsequent chairman of the wheat board, sought to stabilize the market by purchases.

McFarland became chairman of the first wheat board in August, 1935, but held that office only briefly, resigning after the election that put the Liberals in power.

Near the end of the life of the Conservative government headed by Rt. Hon. R. B. Bennett the amount of wheat held by the government was placed at 200,000,000 bushels.

The new board, headed first by J. R. Murray of Winnipeg, and subsequently by George Mulver, made no statement of the amount it held, though it was believed to have been selling constantly.

When the policy of unloading was announced in December, 1935, Trade Minister Euler declared the government had no plan for a "fire sale" of wheat as was charged by its opponents, but would establish a policy of selling "to have our surplus restored to a normal basis."

Winnipeg—G. H. McIvor, chief commissioner of the Canadian wheat board, refused to comment on federal Trade Minister Euler's statement the Canadian wheat board has disposed of its wheat holdings.

Mr. McIvor confirmed Mr. Euler's statement the board accumulated quantities of wheat for distribution as seed. This wheat has been purchased by the Saskatchewan government for needy farmers.

"The Canadian wheat board have been accumulating some quantities of wheat to be used as seed purposes in the drouth areas of Saskatchewan," Mr. McIvor said.

"This wheat is being held at country elevators and terminals in western Canada and will be moved forward to drouth area points when a survey of requirements is made by the Saskatchewan government, who have purchased this wheat from the board.

No statement of the exact quantities purchased will be issued by the board at the present time," the head of the wheat board said.

Will Be Finished Soon

Hangers For West Have Been Designed For Expansion

Montreal.—S. J. Hungerford, Trans-Canada Air Lines' president, said hangers at Winnipeg and Lethbridge, Alta., will be completed "within the next four months." Construction at Winnipeg already is under way and building of the Lethbridge hanger will start immediately.

The hangers have been designed for expansion.

"This is the first time the factor of growth has entered plans for hanger construction," Mr. Hungerford said. "The practice has been to build hangers to house planes of definite size and they tend to become obsolete as larger aircraft come into use. There will be no question of our hangers being obsolete or undersized in a few years."

Need More Fuel

Winnipeg.—Hon. J. G. Taggart, Saskatchewan agriculture minister, said that although Saskatchewan's grain requirements are pretty well filled for the winter, the province could still use all the fodder Manitoba farmers could supply.

ONE OF THE "DANGER" SPOTS IN FRENCH ARMS PILOT

The cement works at Villeneuve, France, which was raided during the recent French arms plot, was shown above being guarded by police during the investigation, which yielded an enormous amount of arms and ammunition.

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Seasile Grain Co. Ltd.

Argentina is making strenuous efforts to improve the quality of her wheat. She hopes eventually to offer on world markets qualities equal to Manitoba No. 1 and No. 2 Northern!

As a first step, news dispatches tell us, the Argentinian has established a grain office in London, not for marketing wheat, but to find out which varieties that can be grown in Argentine will best please British and European millers.

It is then the intention of the Government to arrange for the growing of large quantities of pedigreed seed of the selected varieties, to offer this high class seed to farmers at reasonable prices, and to induce them to use, in each district, a recommended variety only.

The Argentine evidently simply intends to adopt the identical methods Canada has been successfully using for 30 years. Nevertheless, this new threat to Canada's wheat superiority must be taken seriously. We cannot afford to rest on our laurels. Canada can retain the leadership in wheat quality she now enjoys provided our farmers will put forth still further efforts by using only good seed of recommended varieties.

The "Crop Testing Plan" results reveal that 40 p.c. of our farmers are not growing recommended varieties, neither are they using the best seed, so there is evidently much room for further improvement.

Identifying the Hen.

The co-operative marketing system of Denmark is said to be one of the finest organizations of its kind anywhere. A contemporary says: "So thoro is the inspection system and the bookkeeping that is part of it that it is a Danish boast that should anybody encounter a bad Danish egg at his breakfast table in London, Paris or Berlin, he can send it back to the importer, who will transmit it to the Danish exporter, who will, thru his co-operative organizations, trace it back to the farmer, who in turn can identify the hen that laid it, and speak to her about it."

"NORTHERN" Rubber Footwear

The "Northern" range of Overshoes for Men, Women and Children offers a wider selection than ever. Jersey or Cashmere in various heights with buckle, strap or Whizzer fasteners.

A complete range of "Northern" Rubbers and Styl-Shus is on hand to meet your needs.

TWO NEW TIRES to keep wheels MOVING

Where the going is hardest these tires will pull you through while other tires slip, close, stall and let you down.
The Lug Tire is designed for trucks, tractors, graders, etc. It gives maximum traction forward and backward in deep mud or snow without sacrificing smoothness, comfort and silence on im-

proved roads.
The Studded Tire is designed for the cars of farmers, doctors, mail carriers or for anyone whose duty takes him into the mud and clay of unimproved roads and into snow on any road.
Come in and let us show you these remarkable new Goodyear Tires.

With its wonderful grip the Goodyear Lug Tire pulls through mud of any grade.
Unless you actually burst the Studded Goodyear will pull through the worst of roads.
In snow the Goodyear Lug Tire gives extra traction, holds the car steady, and speeds.

GOODYEAR

Amazing New CAR HEATER

**HEATS HOT IN
90 SECONDS**

You'll get more heat and faster heat—guaranteed—with this new type car heater, because the Stewart-Warner South Wind uses an utterly new principle. It burns gasoline in a *patented, sealed metal chamber*—at an average cost of only *1/2* of a cent an hour! It's fast—simple—safe—fully automatic. An electric igniter lights the gasoline, and then shuts off so there's no heavy drain on your battery. No fumes can escape into your car—no air from inside the car is burned. Easy to install—no hole—no extra thermostat to buy. Come in—see it—enjoy its winter comfort—today!

Allen, Publisher, Toronto.

CHAPTER III.—Continued

"A sure, quick cure for hives"—no, that's not it. He was about to consign this letter to the flames, when he reconsidered. "Better keep it," he remarked. "One never knows when one might have hives." He sifted through the remaining missives, crumpling the bulk of them and pitching them into a fire-place so wide and high that a hippopotamus could have been barbecued there.

"Funny," he said. "Always losing letters. I put this one in a safe place and now I can't find the safe place. But no matter. I remember most of it."

"Tell us."

"It seems," said the Earl, "that a certain millionaire would like to take the castle."

"Take it?"

"I mean to say rent it. He wants it for one month only."

"Odd idea," remarked Lady Rosa Bingley.

"Odd fish, from what I gather," said her father. "But dripping with currency. Made it himself, I believe, though, just how MacKintock did not say."

"What's his name?"

The Earl furrowed his brow.

"Atkinson? No. Ely? No. Dixon? Frispe? No, that's our butchering friend. It could be Gatsboro. It isn't though. Whiteman? Can that be it? Or is it Catermole?"

"Never mind, father."

"I won't," said the Earl. "He'll know his own name. Bound to."

"Know many?" asked Lady Rosa. "Enough," answered Duff-Hooper. "All impossible. Richer they are the more impossible they are, and I judge that this one must be a prime specimen. I hate to think of Bingley crawling with the creatures. I'd rather it were beetles."

"If you know a beetle with a thousand pounds, wire me at once," said the Earl. "I don't, myself, relish the idea of letting Americans, or Britons, for that matter, camp here, but it is our one way to raise the wind."

"But, father," said Rosa, "will he pay a thousand pounds for just one month? That's a pretty stiff sum."

"You're telling me," said the Earl. "He said Duff-Hooper took pains."

"I heard a chap say that in the cinema," explained the Earl. "It was a picture about a rather disolute character who did not care for constables and went about impaling them on a sword-stick, like so many butterflies, you know. Another shady individual told him that the heat was on and he had better scran and he replied—"

"Tell us more about the millionaire," said Rosa.

"Delighted to," said the Earl. "MacKintock says he is extraordinarily keen on castles. Quite castle-draft, in fact. He told Mac that he'd made up his mind when only a nipper that some day he'd have a castle of his own, and I infer that he's the sort of citizen who gets what he wants. He even spoke of buying Bingley, if he liked it. Fancy!"

"What? You wouldn't sell?" said Rosa, quickly.

"Chop my nose off with a dull hoe before I'd do that," replied the Earl.

"When does our millionaire arrive?"

"Any moment now," said the Earl. "He's on his way down from London."

"Suppose he doesn't take the castle?" said Duff-Hooper.

"Must you be a killjoy, Esme?" demanded the Earl. "Of course, he'll take it. At least," he added, "I pray he will."

"But if he does not?" persisted Duff-Hooper.

"In that lamentable event," said the Earl, "I shall set up in business as a batcatcher."

"I intend to be very nice to him," said Rosa. "As for you, Esme, no dirty looks."

"What?"

"Rosa means," said the Earl, "no growling or glaring. Can he help it if you don't do on Americans? After all he is going to give us a much needed leg-up. It will never do to treat him as if he'd come here to pinch the Bingley rubles."

"What rubles?" asked Lady Rosa.

"Just a figure of speech, my dear," replied the Earl. "If we ever did have any they'd have gone up the spout long since, can promise you."

"He sifted through the remaining missives, crumpling the bulk of them and pitching them into a fire-place so wide and high that a hippopotamus could have been barbecued there."

"Will he want to move in immediately?"

"Buffy, I take it, is his intention," said the Earl. He sighed.

"I'd rather spend a month with a dentist than with Julia. Why she must serve sheep-dip for port. I can't think. And her Yogi! But we can't afford to put up at an hotel, so it's ho! for the Isle of Man—if the car is still running? Is it?"

"Yes. Just fixed."

"Splendid. Well, tootle on down to Jolly Julia's tomorrow and leave our moneyed friend to wallow in the historic charms of old Bingley. And do remind me to show him where the bath-room is. If he couldn't find it during his month, he might be irked."

There was a tap on the library door.

"Crump," said the Earl of Bingley. "Only he has so discreet a knock."

He called out.

"Come in, Crump."

The butler entered. He was a slow and comfortable man. The years had abraded from his hair and added to his girth. Had he been dressed in a bathing suit, toga, kimono, serapi, or diver's outfit, he would still have looked like a butler. At the moment excitement rendered him a thought breathless.

"Beg pardon, m'lud," he said, "but there's a person behaving most queerly in the grounds."

"Is there really?" said the Earl, calmly. "Tell him not to, Crump."

"What is he doing?" asked Lady Rosa.

MOTHER OF FIVE WHO WAS ALWAYS TIRED

Now Awakes As Fresh
As A Daisy

A mother of five has a lot to do. Especially a country mother. And this one was "always tired." But Kruschen ended all that—now she gets up, feeling fresh, at five o'clock in the morning! She writes:

"I find Kruschen: Salts the best thing money can buy for my health. I am the mother of five children, and before taking Kruschen, I was always feeling tired and run down. Now I am glad to say that I get up feeling fresh—and I get up at five o'clock in the morning. I do my housework, look after my children, and leave the house at 6:30 to start my daily work."—(Mrs.) R.

Tiredness and that run-down feeling can be traced to one root cause. That cause is internal sluggishness; failure to keep the bowels free from poisonous waste matter.

Kruschen's Salts is an excellent recipe for maintaining a condition of internal cleanliness. The numerous salts in Kruschen stimulate your internal organs to smooth, regular action. Your inside is thus kept clear of those morbid wastes which are allowed to accumulate, lower the whole tone of the system.

"Hugging a horse, your ladyship," replied Crump.

"He should not do that here," said the Earl. "Tell him I'm an animal-loving myself, but there is a place for everything."

"Not knowing, can't say," said Crump.

"One of Esme's horsey pals; perhaps," suggested the Earl.

"Oh, no, Crump," said Crump. "I am positive that no friend of Captain Duff-Hooper would have a horse like that. Why, he appears to be intoxicated and he is trying to waltz."

"Dear, dear," said the Earl, "that won't do at all, you know. Shoo him away, Crump, shoo him away at once. We are expecting an important visitor. Our millionaire's first view of Bingley should not include a squiffy stranger waltzing with a horse."

"Beg pardon, m'lud," corrected Crump, "but it is the beast which is intoxicated and trying to waltz."

"I wish he wouldn't," said the Earl. He stroiled to the window and looked out.

"I wish I had a horse that could do tricks," he remarked wistfully. "If I hadn't been born an earl, I'd have gone with a circus. And I may do so yet. Crump!"

"Yes, m'lud."

"Just give the fellow a shilling, thank him for his performance, tell him to toddle along elsewhere."

"Yes, m'lud."

Crump filtered out of the library.

"I think, my dear Rosa," said the Earl, "that when our millionaire arrives you had better show him about the place. Would you mind?"

"I fully intend to," said Lady Rosa. "You'd take a week to it, the way you tumble on."

"I do rather humbly, don't I?" said the Earl.

He marched to the fire-place.

"Must practice earping a bit," he remarked.

He stood with his back to the fire, his feet spread wide apart, his arms behind his back, and he contorted his usually vacuous features into an expression approaching haughty dignity.

"Isn't that how earls do it on the cinema?" he asked.

"Every inch an earl," laughed Rosa, and kissed him.

Crump eased his presence into the room.

"The person who was embracing the horse which was intoxicated and trying to waltz is at the door," he declared. "He states that he wishes to see the castle."

"Did he juggle, Crump?" asked the Earl.

"He heard no sound, m'lud."

"Is he an American?"

"Indubitably."

"Our millionaire!" cried the Earl. "Four him in, Crump."

"At once, m'lud," said Crump. "But may I say that you are mistaken in supposing him to be a millionaire. He hasn't the look of one at all. He is young, and his clothes—well, m'lud, you saw his clothes!"

"So I did," said the Earl. "But what do clothes signify? Look at mine. Millionaires do not wear gold suits with diamond buttons, you know."

"Beside," said the Earl, "Americans have their own ideas, you know. Some of them dress as if their tails were upholsterers. Trot him in, Crump."

"Excuse me, m'lud," said Crump, with a show of emotion, "but may I remind you of the object on which he arrived. Surely you recall his horse."

"Perfectly," said the Earl, glancing through the window. "He is even now munching my rose-geraniums. Ask him not to, will you, Crump?"

"Yes, m'lud."

But Crump did not go.

"If," he said, "he is selling something and you buy it, m'lud, I hope you will not hold me responsible."

"I won't," answered the Earl of Bingley. "So you need not stand there looking like a beached porpoise. Rot him in."

(To Be Continued)

Some Amazing Figures

Statistics About Telephone Show
How Habit Has Grown

Statistics are dry enough, but there are some amazing figures about the telephone in the National Geographic Magazine.

New York has more telephones than all France with its 42,000,000 people. Chicago has more than all South America, and Los Angeles more than all Africa.

There are 800 people telephoning from the Atlantic to the Pacific every day, connected up at New York. One can pick up a telephone transmitter and get connection with anyone of 32,500,000. And that number is 93 per cent. of all the telephones of the world.

There are seventy countries interlocked by wire or radio with the telephone system of Canada. Only Soviet Russia and New Zealand, also Greenland, are as yet unconnected with the world telephone network.

The United States records 85,000,000 phone conversations a day. The statistics do not give the number of listeners in on the rural party lines. Shades of Alexander Graham Bell—St. Catharines Standard.

Samples Are Rich

More Gold Has Been Found In
Northern Areas

Valuable gold discoveries have been made in the Contact Lake area in northern Saskatchewan. Contact Lake is located between Stanley and Lac la Ronge, about 200 miles north of Prince Albert. It is reported that prospectors in this district have traced a vein eight feet wide for more than 200 feet and have found out-cropping for an additional 600 feet. Samples of the ore assayed as high as \$633 a ton.

On small Danish farms, stable, granary, and family living quarters are all in one building, with hay being stored over both family and stable quarters.

COULDN'T EAT COULDN'T SLEEP

Now Free of Bad Liver and Kidney
Troubles and Feeling Fine

Here's another woman who felt terrible until she found how to get back appetite, sleep soundly, and in good health. Mrs. A. H. Montreal, writes:

"I had years of liver complaint and dany headaches—bowels irregular, crippled with kidney trouble too—no appetite—no sleep. Many laxatives gave me cramps. I tried fruit- &-dew and my health greatly improved. These famous fruit juice, herbs, and tonic tablets cleanse and strengthen the liver, help stomach, kidneys, intestines. Troubles go. Health must improve. 25c. and 50c. All druggists."

What I possess, or what I crave, brings no content great God to me.

If what I would or what I have, Be not possessed and blessed in These.

What I enjoy, O make it mine, In making me that have it, Thine.

Offer up to God all pure affections, desires and regrets, and all the bonds which link us to home, kindred and friends, together with all our works, purposes and labors. Those things which are sacred will become then the matter of thanksgiving and prayer. Plans for the future, all wishes and intentions, works just begun, half done, all but completed, sympathies and affections, all these things through the heart and will. The only way to master them is to offer them up to Him as, once ours, always His by rights.

What I possess, or what I crave, brings no content great God to me. I Chron: 4:10.

What I would or what I have, Be not possessed and blessed in These.

What I enjoy, O make it mine, In making me that have it, Thine.

McFarland Heads "Unity" Council.

John L. McFarland, of Calgary, former head of the Dominion Wheat Board, has been named head of a provisional "Unity" Council for Alberta, at a conference held last week in Red Deer, of representatives of the People's League, Conservative party and members of the UFA. It was decided to launch a "Unity" program in opposition to Social Credit Government. It is stated that Mr. McFarland has accepted the appointment.

Each constituency is to retain its autonomy, the conference decided. The provisional Council is to function until the formation of the permanent body. It is expected that final action will be taken on the proposal by the UFA when it holds its annual convention next month.

Tobacco on Week Days, Silverware on Sundays.

Sydney May, in The Western Farm Leader: Now that the Canadian Broadcasting Corporation is handing over the "People's Network" for the purpose of ballyhooing baking powder, coffee and tobacco on week days and silverware on Sundays, perhaps Rt. Hon. W. L. Mackenzie King will inform radio fans why they should be soaked \$2 a year to listen to this stuff.

Wasn't the CBC formed to eliminate some of the program advertising and not to increase it? Don't all reply at once!

So, Crusty Bill intimates, what with a Provincial Government proposing to look after the editorial end, and the Federal Government, thru the CBC, going into the National Advertising business in a big way, newspapermen will soon have to look for some other way of making a living.

Of course the public has a right to expect that there will be a Government guarantee behind the goods advertised by the CBC, or has it?
